Subject Index to Volume 5

Acetobacter liquefaciens (So) 221
Acclimatized culture (Liu) 367
Aerobic biodegradation (Liu) 367
Agricultural soil (Stratton) 319
Alkaline reductase (Mallick) 207
Ames test (Xu) 1
Anaerobic biodegradation (Liu) 367
Antifouling coatings (Joshi) 389
Aquatic contaminants (Ribo) 135
Aquatic toxicity (Roberts) 279
Aquatic toxicity (Walker) 61
Aquatic toxicity (Walker) 103
Artemia salina (Devillers) 405
Azo dye (So) 221

Bacterial luciferase (Lampinen) 337
Battery tests (Devillers) 405
Bioassay (Mazidji) 253
Bioconcentration (Walker) 61
Biodegradation (So) 221
Biotoxicity (Joshi) 389
Bacterial bioassay (Ribo) 135
Battery of tests (Clarke) 153
Beta-galactosidase (Dutton) 253
Bioassessment (Clarke) 153
Bioconcentration (Walker) 103
Biodegradability (Liu) 179
Biotransformation (Liu) 179
Brachydanio rerio (Devillers) 405

Cadmium adsorption (Bauda) 47
Cadmium toxicity (Bauda) 47
Candida albicans (Devillers) 405
Candida parapsilosis (Devillers) 405
Candida tropicalis (Devillers) 405
Carbon fixation (Mallick) 207
Cascade filtration (Rao) 91
Ceriodaphnia dubia (Mazidji) 253
Chemical effect (Rhodes) 77
Chemical fate (Liu) 179
Chemical fate (Walker) 61
Chemical fate (Walker) 103
Chemical mixtures (Ribo) 135
Chemoattraction assay (Roberts) 279
Chlorinated phenols (Ribo) 135
Chlorine substitution (Liu) 367
Chlorophenols (Liu) 367
Commercial formulation (Stratton) 319
Continuous-flow system (Rhodes) 77
Cresols (Liu) 367
Cryptococcus neoformans (Devillers) 405
Cyanobacterium (Mallick) 207

Daphnia magna (Devillers) 405
Decolorization (So) 221
Decomposition kinetics (Stenström) 15
Diazinon (Mazidji) 253
2,4-Dinitrotoluene (Liu) 179
DO depletion test (Salama) 237

EC_{50} (Devillers) 405
EC_{50} (Lampinen) 337
EC_{50} (Mazidji) 253
EC_{50} (Paran) 351
EC_{50} (Rao) 91
EC_{50} (Samoiloff) 309
EC_{50} (Walker) 103
Ecological effects (Pratt) 189
Ecological responses (Pratt) 293
Ecosystem surrogates (Pratt) 189
Ecotoxicity (Devillers) 405
Ecotoxicity assay (Dutton) 253
Effluent assay (Paran) 351
Endosulfan (Stratton) 319
Environmental effect (Walker) 61
Enzyme activity (Pratt) 189
Erythrocyte ATP assay (Clarke) 153
Escherichia coli (Devillers) 405
Escherichia coli (Lampinen) 337
Extraction procedure (Kwan) 395

Factors affecting microtox (True) 29
Fermentor test (Liu) 179
Freshwater algae (Wong) 167

Genetically-engineered cell (Lampinen) 337
Genotoxicity (Kwan) 395
Glutamine synthetase (Mallick) 207
Glyphosate (Stenström) 15
Gram-negative bacteria (Dutton) 253
Great Lakes (Wong) 167
Growth rate inhibition (Paran) 351

Hazard evaluation (Roberts) 279
Heavy metals (Paran) 351
Heavy metal toxicity (Mallick) 207
Heavy metal uptake (Bauda) 47
Herbicide mineralization (Stenström) 15

IC_{50} (Salama) 237
Induction phase (Stenström) 15
Insecticide (Stratton) 319
Interstitial water (True) 29
Laboratory microcosms (Pratt) 293
Lag time (Liu) 367
LC_{50} (Joshi) 389
LC_{50} (Mazidji) 253
LC_{50} (Salama) 237
LC_{50} (Walker) 103
Luminescence activity (Lampinen) 337

Marine pollution (Salama) 237
Marine sediment (True) 29
Mathematical algorithm (Ribo) 135
Membrane (Dutton) 253
Metabolites (Liu) 179
Metal binding mechanism (Bauda) 47
Methyl red (So) 221
Microbial communities (Pratt) 189
Microbial bioassay (Salama) 237
Microbial communities (Pratt) 293
Microbial ecology (Rhodes) 77
Microbial production (Pratt) 189
Microbial respiration (Pratt) 189
Microcapillary assay (Roberts) 279
Microcosm procedure (Pratt) 189
Microtitration SOS chromotest (Xu) 1
Microtox® (Mazidji) 253
Microtox test (Clarke) 153
Microtox test (Devillers) 405
Microtox test (Rao) 91
Microtox test (Ribo) 135
Microtox test (True) 29
Moisture content effect (Stenström) 15
Mureinoplast (Bauda) 47
Mutatox (Kwan) 395

Nematode bioassay (Somoiloff) 309
Nematode test (Clarke) 153
Nitrate reductase (Mallick) 207
Nitrification (Stratton) 319
Nitrifying organisms (Rhodes) 77
Nutrient dynamics (Pratt) 189
Nutrient uptake (Mallick) 207

Oil and grease (True) 29
Organisms used in aquatic toxicity (Walker) 103
Organisms used in chemical fate (Walker) 103
Outer membrane (Bauda) 47

Panagrellus redivivus (Somoiloff) 309
Particle size (True) 29
Particle size fraction (Rao) 91
p-Benzoquinone (Devillers) 405
Permeability (Dutton) 253
Pesticide genotoxicity (Xu) 1
Pesticides (Mazidji) 253
Photobacterium phosphoreum (Devillers) 405
Phytoplankton (Wong) 167
Polynuclear aromatic hydrocarbons (True) 29
Pre-incubation effect (Stenström) 15
Primary productivity (Wong) 167
Prorocentrum micans (Devillers) 405
Protoplast (Bauda) 47
Protozoan assay (Roberts) 279
Pseudomonas aeruginosa (Devillers) 405
Pseudomonas aeruginosa (Joshi) 389
Pseudomonas fluorescens (Bauda) 47
Pseudomonas fluorescens (Paran) 351

Resazurin test (Liu) 179
Risk evaluation (Clarke) 153

Sediment (Kwan) 395
Selenium toxicity (Pratt) 293
Sensitivity comparison (Paran) 351
Short-term bioassay (Liu) 179
Short-term bioassay (Paran) 351
Short-term bioassay (Salama) 237
Single-species test (Devillers) 405
Soil nitrification (Rhodes) 77
Soil perfusion (Stratton) 319
Solvent extracta (True) 29
SOS chromotest (Clarke) 153
Species richness (Pratt) 189
Species richness (Pratt) 293
Staphylococcus aureus (Devillers) 405
Steady-state (Stenström) 15
Streptococcus faecalis (Devillers) 405
Sub-lethal effects (Samoiloff) 309
Substitution effect (Liu) 367
Substrata–microcosm (Pratt) 189

$t_{1/2}$ (Liu) 367
t_{90} (Liu) 367
Terrestrial ecosystems (Rhodes) 77
Tetrahymena pyriformis (Roberts) 279
Torulopsis glabrata (Devillers) 405
Total biomass (Pratt) 293
Toxi chromotest (Clarke) 153
Toxi chromotest (Kwan) 395
Toxicity (Kwan) 395
Toxicity (Liu) 179
Toxicity (Mazidji) 253
Toxicity assay (Paran) 351
Toxicity assay (Stratton) 319
Toxicity evaluation (Lampinen) 337
Toxicity measurement (Rao) 91
Toxicity ranking (Samoiloff) 309
Toxicity screening (Dutton) 253
Toxicity screening (Paran) 351
Toxicity screening (Samoiloff) 309
Toxicity test, bacteria (Devillers) 405
Toxicity test, crustacea (Devillers) 405
Toxicity test, dinoflagellate (Devillers) 405
Toxicity test, fish (Devillers) 405
Toxicity test, yeast (Devillers) 405
Toxicity testing (Rhodes) 77
Toxicity testing (Ribo) 135
Toxicity testing (Walker) 103
Toxicity testing criteria (Walker) 103
Toxicity testing guidelines (Walker) 103
Toxic Substances Control Act (Walker) 61
Toxic Substances Control Act (Walker) 103
Tributyltin homopolymers (Joshi) 389
Tributyltin monomers (Joshi) 389
Tributyltin polymers (Joshi) 389
Trophic level (Devillers) 405

Viable plate count (Salama) 237
Vibrio harveyi (Lampinen) 337

Wastewater fractionation (Mazidji) 253
Water quality objective (Wong) 167

Zinc toxicity (Wong) 167
Zinc uptake (Wong) 167
